

TTRNA congratulates graduates of The School of Community Health and Post Basic Nursing Education

TTRNA was pleased to be invited to the School of Community Health and Post Basic Nursing Education graduation ceremony held on Wednesday 15th 2018 at City Hall, POS. With the theme “*Caring hearts with healing touch*”, graduates crossed the stage to receive their well-earned certificates in Neonatal/Pediatric, Preceptor, Operating Theatre, Trauma and Emergency, and Critical Care.

These specialist nurses will go a long way in supplementing the shortfalls experienced in our nation’s hospitals. TTRNA congratulates the work put in by the

successful graduates and especially the hard-working staff of the school who continuously undergo a difficult learning environment. Some of these difficulties were mentioned by Mrs. Paula Smith-Lovell in her report. They included operating out of a mall on Frederick Street, no security of tenure for staff, no parking facilities, no internet, inadequate library facilities, external lecturers not being paid, only 2 classroom spaces available, shortage of coordinators, no lecturer for the preceptor program and many more.

Unfortunately, this report did not reach the ear of those responsible for such woes, as both Honorable Ministers of Education (Mr. Anthony Garcia & Mr. Lovell Francis), who were both carded to deliver an address, did not attend nor did they send an apology or a representative to the event. TTRNA takes note of the importance the Government places on nursing issues yet again.

Congratulations to Post Basic Graduates 2018
